Network analysis of metabolic subsystems

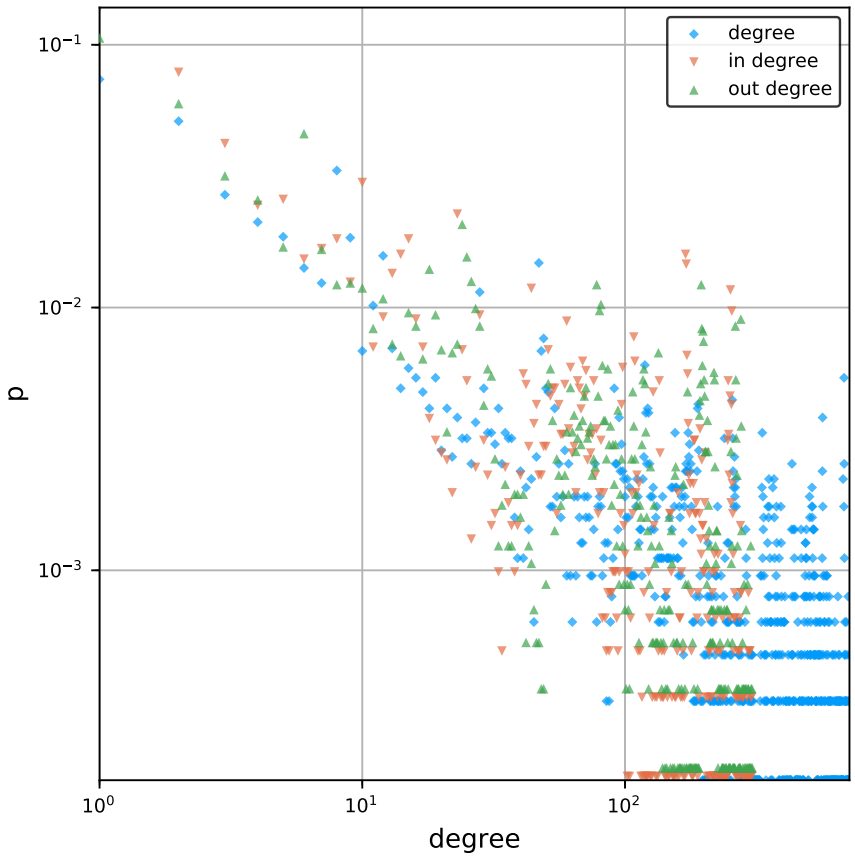
Network stats

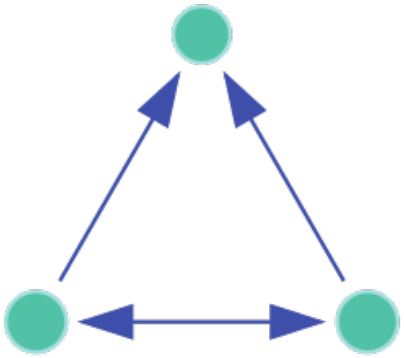


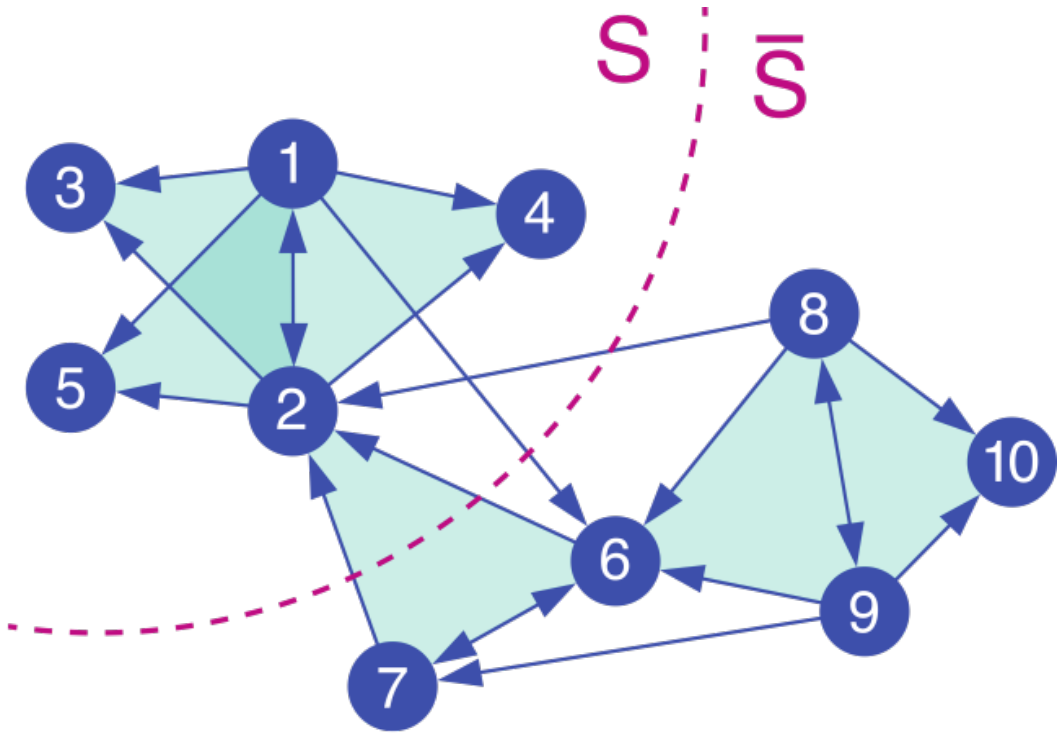
$\|V\|$	$\|E\|$	$\langle C \rangle$	E_{90}	ρ	$\langle k \rangle$
6,663	656,609	0.012	15	0.015	194.1

Community detection

Algorithm	NMI
Louvain Modularity	0.10
Clauset-Newman-Moore	0.27
Infomap	N/A
Girvan-Newman	N/A

Motif based community detection





$$\phi_M(S) = \frac{\text{motifs cut}}{\min(8, 10)} = \frac{1}{8}$$
